## **Friday**

### ***Hygiene Explosion!***

In this all-day lecture Bertha Triche RDH, will share proven strategies created by Wendy Briggs, RDH. She will share how hygienists nationwide have transformed their lack luster program into a 'World Class' Hygiene Department. Serving patients with a comprehensive focus, providing more complete care and creating raving fans at the same time. Not just for the Hygienist, this lecture is for the entire team. Dentists, Hygienists, Team Leaders and all auxiliary members will want to attend to learn entire systems for a 'World Class' Practice.

Have you ever wondered how to increase Case Acceptance from Hygiene, and what tools can help patients move forward? In the afternoon session, Wendy's trademarked New Patient Experience 65 Points of Contact Formula focuses heavily on improving the New Patient Experience. This all new, incredibly valuable information will help you improve your communication skills so the patients better understand your recommendations.

*Bert Triche is a registered hygienist with over 32 years' experience in dentistry. She is a practicing hygienist and is currently coaching and training for The Team Training Institute, focused on increasing practice profitability and improving hygiene systems. Bert is a proven top producer in the field and has coached many hygienists to more productive hygiene days. She has worked in all aspects of the dental practice...hygienist, chair side assistant, front desk manager, treatment coordinator, marketing director and most recently office manager. She has a really unique delivery style which is quite entertaining; infused with her passion and enthusiasm for the profession. Bert has been a coach with The Team Training Institute for 2 years. She currently lives in Reserve, LA just outside of New Orleans with her husband and 3 children.*

## **Saturday**

### **Current Issues in the Dental Hygiene Profession**

(1 CEU) - Changes in organization By-Laws

(Check website for agenda - [nmdha.org](http://nmdha.org))

### ***Lasers in the Treatment of Periodontal Diseases***

In this clinical program you will learn the specifics of laser fiber optic delivery and discover the delicate nature of using a laser device. This lecture is designed to build a basic clinical understanding of laser technology and its place in Hygiene treatment. Topics to be reviewed include: diode laser use in conjunction with SRP in the reduction of bacteria in periodontal pockets and laser tissue interaction with respective power settings. This lecture does NOT certify participants to operate a laser.

*Windi Vigil, Masters in Health Education from the University of New Mexico. Trained by Ivoclar Vivadent, a leader in laser technology. At Ivoclar Vivadent, passion, vision and innovation are the driving forces. A research team of more than 130 employees spend countless hours developing comprehensive solutions to oral health and dental problems. Our scientist collaborate with renowned international institutes and universities to develop and test products before they go to market. Our innovations will become tomorrow's standards.*

### ***Local Anesthesia Review and Update***

This review of anatomy and physiology as well as updates on the latest techniques and materials will improve your accuracy and confidence in providing local anesthesia for your patients. Course will include:

- Gow-Gates mandibular block
- Computer Controlled local Anesthetic delivery
- Anterior Middle Superior Alveolar injection technique
- Oraverse local anesthesia reversal agent
- Local Anesthetic Sodium bicarbonate neutralizing solution
- Nasal spray for palatal anesthesia

*Dr Manz graduated from the University of New Mexico in 1984 with a BS in Physics. He spent 10 years in the United States Navy as a Submarine officer, having achieved the rank of LCDR and receiving his Masters in Naval Nuclear Engineering. After his tour in the Military, Dr. Manz went to Dental School at the University of Colorado and graduated in 1998. He spent 6 years in private practice in his wife's home town of St Johnsbury VT before returning to his native New Mexico. Dr Manz is currently the Director of the Dental hygiene Program at San Juan College in Farmington.*

### ***Fluoride Therapies in the Prevention and Management of Dental Caries***

Management of the caries-prone patient requires a multifaceted approach – caries risk assessment, in office care, patient education, and at-home regimens. This approach has been in the forefront for treating the at risk population. Fluoride therapies play an important role in the in-office and at-home fluoride treatment programs in the prevention and management of dental decay. It is an accepted but often under-utilized therapy. This program will provide the participant with an overview of caries development, the incidence and prevalence of dental decay in various populations, and the role of in-office and at home fluoride therapies in the management of patients who are at risk for caries development. An overview of Caries Risk Assessment will also be presented.

*Dr. Rojas received his dental degree from Colegio Odontológico Colombiano in Bogota, Colombia and completed a fellowship in Oral Surgery at the Universidad Complutense de Madrid in Spain, in addition to Continuing Education at New York University. Dr. Rojas has over 19 years of clinical, educational and research dental experience. Jorge's career as Dental professional has developed and presented courses for student dental professionals, general practitioners, residents and others dental professional's combining his set of skills as researcher , clinician , advocate, community outreach information, to provide and share the best of his dental knowledge. His focus is to provide dental professionals with current scientific research and information to assist them with making active, evidence-based recommendations in their clinical practice. Jorge is an active member of the International Association for Dental Research, American Dental Association and Spanish Society of Implantology.*
